BIG-IP Virtual Edition (VE)

Notes on F5 Version Plus license offerings for BIG-IP Virtual Edition (VE).

Version Plus licenses enable customers to use BIG-IP Virtual Edition (VE) with perpetual usage. However, upgrades are limited to two major software versions. The additional versions will be allowed as part of license reactivation during the software upgrade process. The software development and support timelines are established through the policies and published upon each major and minor release and posted on the F5 Webportal.
